

Boston Electronics Signs Distribution Agreement with PremierPhotonics

September 25, 2026; Brookline, MA – Boston Electronics, a leader in the worldwide distribution of advanced electro-optical products and solutions, announces a new partnership with PremierPhotonics of Livingston, Scotland, UK. This partnership combines Boston Electronics’ presence in the infrared (IR) market with PremierPhotonics’ advanced InGaAs PIN and APD (Avalanche Photodiode). Under the new agreement Boston Electronics will distribute PremierPhotonics InGaAs products into the North American and selected international markets.

“The partnership with PremierPhotonics is very exciting for Boston Electronics. We see growing demand for advantaged and readily available InGaAs products in the market, and we quickly recognized PremierPhotonics as a leading supplier of these products. Combined with our other infrared product partnerships, we offer comprehensive IR sensor solutions to the market”, comments Ben Waite, CEO and President of Boston Electronics.

“Customers increasingly recognize the value of PremierPhotonics’ infrared solutions in their products. Products from PremierPhotonics secure your InGaAs supply chain with quick lead times and product stocking at Boston Electronics and in the UK. Together with Boston Electronics we offer a fast, dependable alternative to existing suppliers or as a direct replacement for high-performance InGaAs. Boston Electronics has the application and technical knowledge, strong North American market presence, and a customer focused culture that we were looking for”, commented Matt Tyrk, CEO of PremierPhotonics.

About Boston Electronics - Boston Electronics is a specialist in providing electro-optical solutions including photodetectors, LEDs, tunable lasers, imaging arrays and photon counting detection, spanning the spectrum from ultraviolet to visible, infrared and terahertz. Boston Electronics distributes advanced electro-optical products from premier manufacturers worldwide.

About PremierPhotonics - PremierPhotonics is an agile, fabless photonic manufacturer specializing in the design and manufacturing of photonics technologies. With expertise in the design, volume manufacturing, supply chain management and packaging of photonic devices and assemblies, PremierPhotonics provides end-to-end solutions and support across a broad range of opto-electronic assemblies and technologies. The company’s portfolio includes photodetectors, and laser diodes.
